Attachment No. 1—Information Concerning Forced Labor in the Soviet Union 2 pages: reports on estimates of labor force population at Vorkuta betwee 1947 and 1955. CONFIDENTIAL Attachment No. 2 — Prison Camps in the Magadan Area, 2 pages: presents a information on prison camps in the area from 1951 to 1956. In 1954, about percent of the camps in the area were closed. Prison camps were still operating in Berelyakh and Susuman in 1956. Prisoners working in the Lisk sic, possibly Listvenichnyy (N 53-12, E 112-40)7 mining area complained having to be subjected to "poisonous gases" in their work. SECRET Attachment No. 3 — Prison Camps and Gold Mining in the Maksim Gorkiy Area 6 pages, including 3 sketches of the area. This report states that the 12 gold mines in the Maksim Gorkiy (N 51-24, E 138-53) area produced some the best gold in the Kolyma district. Between 1948 and 1956, there were s political prison camps in the area with a population of about 6.000 which part of the labor force for the gold mines. CONFIDENTIAL	25X1 of 25X1

Date of Report: 30 April 1957 1. Date of Report: 30 April 1957 The Foodstuff Control Section of the Sanbak Laboratory was a component of the Vorkuta camp administration. Installation at approximately 400,000, of whom 250,000 to 300,000 were prisoners. Many of the remainder were former prisoners who were not allowed to leave the area. Most of the free personnel, whether former prisoners or not, lived in the town of Vorkuta. 2. The free population of Vorkuta was in majority Russian, though Volga Germans and Jews constituted large elements. There were some Ukrainians and Caucasians among the free population. The unfree population must be divided into those who had been condemmed as ordinary criminals (about one-third of the total) and those condemmed for political crimes. The criminal population of Vorkuta was in vast majority Great Russian, though there was a Jewish element condemmed for economic sabotage. The Great Russian character of the criminal element may have been the result of a Soviet tendency to house ordinary criminals on the territory of the republic where the crime was committed. The politica were ethnically very diverse. Perhaps one-third were Ukrainians. Another third was made up of Baltic peoples, in roughly the proportion of six Lithuanians to three Estonians and one Latvian. The remaining third was composed of Poles (chiefly from the Vilna district), Belorussians, Caucasi and Central Asians. Among politicals Great Russians were very few indeed. Ethnic composition of the political element to the fact that the Nazi armies occupied, in the main, territories which were no inhabited by Great Russians. Of the few Russian politicals, the majority had been condemmed under article 58.10 of the Soviet criminal code. This article deals with defeatism, criticism of the government, and so on. 3. Data concerning the total number of prisoners was closely held in a specia section of the Central Statistical Office in Moscow,	•		graph and the lead to

- The Maksim Gorki area (see Enclosure No. 1 for sketch map) was famous for its gold and was recognized as the most important gold area in the USSR. The quality of gold in this area was the same as that in the Irkutsk and Bodaibo areas, and it was claimed that the gold in the maksim Gorki area was the best in the entire Kolyma region. Gold was mined in the Maksim Gorki area from May to the middle of September. There were twelve gold mines in the Maksim Gorki area, divided into four districts. An average of 250 kilograms of gold per month was mined during the The person responsible for gold mining in this area summer months. was Harushak Betorof Betrovich (phonetic).
- 2. There were approximately six concentration camps in the Maksim Gorki area with a total of approximately 6,000 prisoners interned therein, all convicted of the most serious political ofenses under Soviet law. The prison camps and the types of persons interned in them were:

No. 1 Camp (see Enclosure

Ukrainian, Jewish, and German prisoners.

No. 2)

No. 2 Camp

Polish, Russian, and prisoners from

the three Balkan countries.

No. 3 Camp

Various persons connected with the Germans, British, and Americans. All interned until Article 58,

Section 6.

No. 4 Camp (see Enclosure

No. 3)

Various nationalities, all considered most serious political offenders.

No. 5 Camp

Russians.

No. 6 Camp

Former high officials of the Communist Party.

- 3. Approximately 50,000 persons died in the Maksim Gorki area during the period from 1937 to 1956. All of these persons were from the working class. Their families were forced to move from the area. It was not known to what area they had been sent.
- 4. The population of the Maksim Gorki area was approximately 1,200.

 Approximately 1,200 members of the Soviet Ministry of Interior (MVD)

 were stationed in this area. The commander of the MVD was a lieutenant
 colonel. The following special officers of the MVD were stationed in
 the Maksim Gorki area: one major, six captains, two first lieutenants,
 thirty non-commissioned officers, and one captain as the chief of the
 prison. The following MVD personnel were connected with the concentration
 camps in the area: five majors and approximately forty captains, first
 lieutenants, and lieutenants. Also stationed in the area was a Special
 Search Unit of the MVD staffed with the following personnel: one captain
 as commander of the Unit, two first lieutenants, eighty subordinates, and
 thirty dogs.
- 5. The following equipment was used by the MVD:

Machine guns

Approximately 12 per camp, for a total of 72.

Automatic guns, firing 25 rounds

Approximately 2,500 to 2,600

ea**c**h

Mauser No. 1

1,000

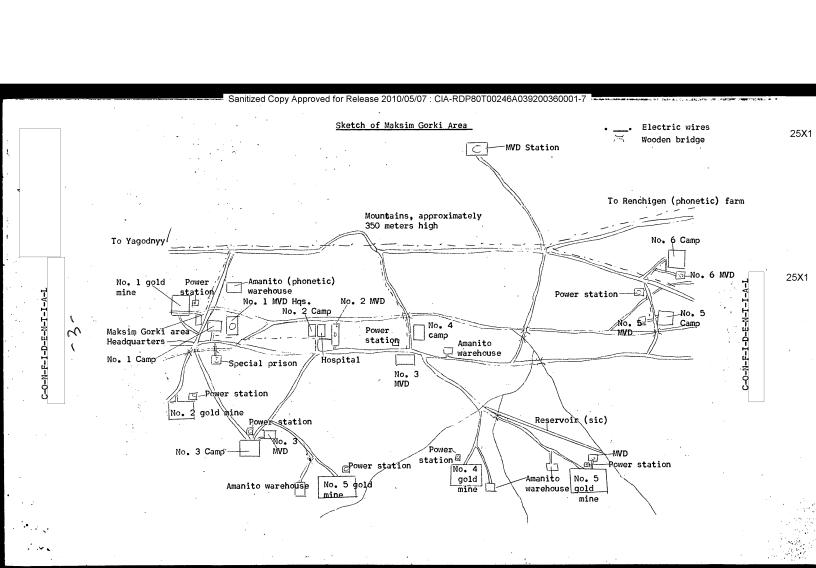

Mauser No. 2

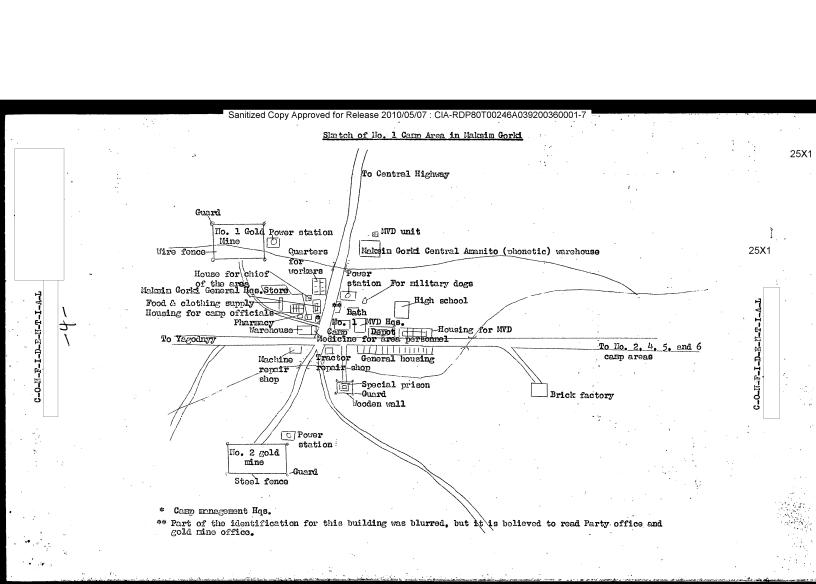

2,000

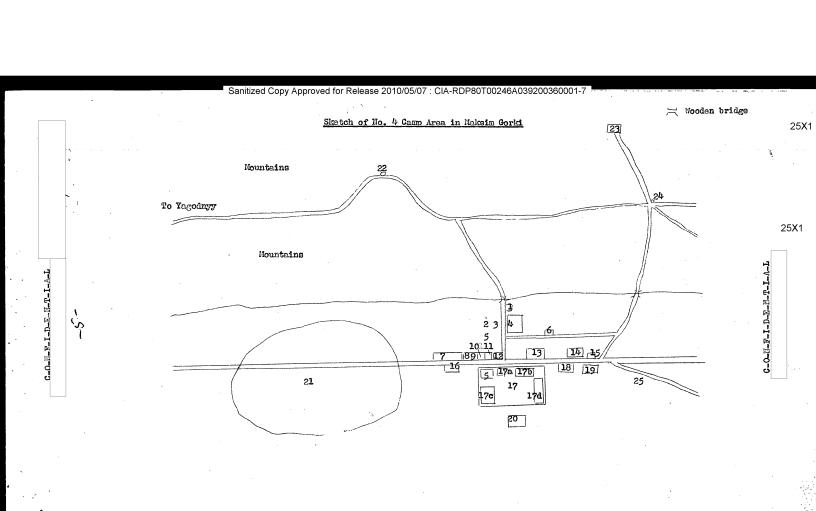

Wireless, hand grenades, poison gas, and approximately 30 automobiles.

6. Since a mass escape of prisoners in 1948, a special search plane attached to the MVD flew from Suzuran (phonetic) daily to circle the Maksim Gorki area.
